They've had a rough start but I have always been glad to support the work they do. Bringing back a lot of the things that made role-playing games great isn't easy and it sure as hell isn't cheap, but these guys put their nose to the grindstone and have released a unique world that I love to play in.

Sometimes the UI is a little rough to get used to but once you figure it out you're in for some good old-school hacking and slashing with more different realms for you to explore than you can shake a stick at.

Thank you for fighting the good fight. I hope to see more from you soon.. I think I have given it a fair shakes, and I can say that the game is extremely Pay2Win in this stage.

I had a rather frustrating game against the Medic, where my entire team piled onto a single medic, yet we couldn't kill her. Her heal, once factored for shots missing, can overcome damage from an entire non-paying team.

The game system has pretty good potential, very catchy soundtrack, but the pay2win, PvP only nature really turned me off.. If you like a sandboxgame where you build industries and research new product and expand our businessempire this is game for you. There are competitors that sometimes compete with you so you have to sell at a lower price but you hardly compete with [them.](#) In the latest update the AI was improved so much so they never lose money or sell shares so some of the winning conditions are no longer possible or at least extremely hard. Personally I prefer this before Rise of industry because here you build large industry buildings and upgrade them rather than build a lot of small industries.. Old game still has what you need in a Warhammer 40k RTS... can't scale to modern resolutions but even in a window it's as good as I remember. "FOR THE EMPEROR!". I really like this game. The exploration with random tiles and the mechanic of the encounters are well thought and it is working well for this type of game.

Sure you cannot make your own hero but the 4 provided are from your typical classes and are fun to play with. You will need to craft items to improve their stats if you want to play in the higher difficulties. You can play and replay each mission with 1-4 of these heros.

Highly recommended for solo players.. I like it =)

Characters are cute, gameplay is smooth  
I find it abit hard.

Basically its a smaller Binding of Isaac, worth checking out though.. If you clock this game and you aren't the King of the Border, someone will get very sad.

Most toxic gaming community ever in some regards and the most dangerous game on steam to brag about clocking.. For the price tag...certainly not recommended. The pictures and video are nothing like the actual game. They make it seem like there is so much more to this game but really it is just a glorified econ game that could have easily been released as a free browser game and is about as cheap and low quality as a free browser game. Very little to do but point and click and mindlessly watch the same few backdrops...you really have no control over anything but the purchasing of equipment and selling of commodities. Oh yeah, there are only two things you can mine in this game...Iron and Gravel.

Don't waste your time or money like I did.

PC Gamer US presented Lords of the Realm with its 1994 "Best Historical Simulation"! This is a simulation of England/Wales without king, so all the different nobles are trying their best to grab the island for their own.

Well there wasn't really that many western turn-based strategy game back then but I certainly enjoyed it many years ago. Even when I am short of funds to buy games for Christmas 2017 I picked the complete collection of lords of the realm after having it on Wishlist for about half a year.

After 5 failed attempts I found I still got it by completing this on highest difficulty once again. The famous "One More Turn" syndrome still pushes me to play this all the way to 4 o'clock in the morning on working day.

The game it still was running very smoothly for me and after the first half an hour you start to get used to the old low-resolution graphics. The music is ever continuous and lacking variety, but you cannot ask too much for a game from 24 years ago. The gameplay itself lacking many of the new mechanics like troop experience points but the smart economic/happiness/health system are very interesting to toy with. You just about have to move those sliders for every county every turn until you take over enough lands and get too lazy to pass it to a steward.

As a very old game it doesn't have trading card and achievements. Dosbox also doesn't support steam overlay's screenshot feature.

New young player beware as this game does not have a tutorial so if you are playing it for the first time make sure you at least read the "readme.txt" guide that's located in the game folder.

I must confess even as a return player I wasn't very confident that I remember how exactly to do this game right, so I had to go on YouTube to watch waytofail's playthrough of this game. Thanks bro for all the tips and reminder.

8/10 and this is what I give for this game now. Back in 1994 it may be the best but now it's aged quite a bit yet it's still enjoyable and recommend for all strategy game fan to try out. It's dirt cheap for a great classic!. At first, I thought it was a clone of Deep Space Waifu, but this game is different. You dodge bullets and stand on targets to remove clothing. It's a unique take on bullet hell games, but in a good way, and the artwork is top notch. The dev has done a terrific job on this. Can't wait for the sequel.. Nostalgia game of Bomberman from 2006 on psp :P

the knocking should be disabled but still amazing game :D LOVE IT!!!. For a change from Europe and US routes you can go for this one..I liked it the way the announcer announces in Japanese language which is the next station coming up.. lot different as there is no English signboards even the signalling here is quite different to that of other countries in TS..Loved it..must buy! #TS2018. Very good improvement upon original Unreal.

Good plot that feel like Mass Effect.

Now we have better plot instead "almost no plot" like many first 3D shooters had.

Nevermind kids who are complaining about the game can't run in win10 or old coots who like storyless and fast killing they had in Unreal 1.

Minuses - slow running speed of your character, long loading times, short campaign and dead multiplayer (yes it has MP)

10/10

But wait for the sale.

\$8 for old game is too much.. There is no legit reason this shouldn't be in your library.. Very entertaining and fun. Worth every penny I spent. Controls are easy and fast to learn, it isn't too easy to get the best score rating (stars in this game) on each level so there is good replay value.

Haven't tried the multi-player yet but if you want to see more, myself and Player Two made a quick first impression video of the first time we loaded it up on YouTube. Feel free to check it out and hopefully it helps.
